## Feel the Music

### SpAudio® & SpAudio II Music Systems

**A.** Enhance your Hot Spring® spa experience with a unique sound system that lets you *feel* every note. Unwind with your favorite relaxing song, or up the entertainment factor during backyard get-togethers. Both the original SpAudio music system, and the next generation – SpAudio II, are completely integrated music systems that send sound waves through the spa shell, turning it into the speaker. Sophisticated components are custom-designed to withstand the spa environment. A powerful amplifier, plus two transducers attached to the spa shell, let you feel the audio vibrations through the water. So you're surrounded by sound and enveloped by music, all while enjoying the calm, soothing relaxation of your spa.

The original SpAudio music system includes a portable CD player, while SpAudio II has a sleek, built-in corner deck unit. The SpAudio II system also includes external speakers and a more powerful amp for additional volume, so you can enjoy the music while relaxing in your spa or from the outside. And for added convenience, the volume and CD tracks can be controlled with the IQ 2020™ remote, which is included with the SpAudio II system or sold separately.

### IQ 2020™ Remote Control

**B.** Control electronic spa functions with the sophisticated, water-resistant IQ 2020 remote control that communicates with your hot tub via two-way radio frequency. The IQ 2020 remote control's unique and advanced technology allows you to conveniently operate most electronic spa features from within the relaxing comfort of your spa.

Enhance your spa experience  
with a unique sound system that  
lets you *feel* every note.

# AutoFresh™ Easy, Smart Water Care

## AutoFresh System

**A.** Hot Spring® Spas offers a revolutionary new water care system that makes owning a Hot Spring spa dramatically easier. Using state-of-the-art dispensing technology designed for the medical industry, the AutoFresh system provides virtually maintenance-free water care.

Gone are the days of dealing with bottles and remembering to add chemicals to your spa. With the AutoFresh system, you simply dip a test strip in the water every two weeks and input the reading into the spa's control panel or optional IQ 2020™ remote control. The sophisticated components of the AutoFresh system are integrated with your Hot Spring spa's IQ 2020™ control system. Together they calculate the precise amount of chemicals needed, and automatically dispense them into the spa water. The AutoFresh system is always at work, so you'll find you use your spa more often. And it's precise, which saves you money – there's no guesswork and no waste.

The AutoFresh system represents the ultimate in ease of water care, and is available only for 2005-to-current Hot Spring spas. With the AutoFresh water care system, you can relax knowing that your Hot Spring spa is the easiest to maintain, smartest spa on the block.

## AutoFresh Cartridge

**B.** The disposable AutoFresh cartridge contains a three month supply of chlorine- and bromine-free sanitizer, oxidizer, and waterline control. It uses biguanide, which is gentle on the eyes, hair, and skin, without a harsh odor. When the cartridge's contents run out, just replace it as easily as you would the ink cartridge in your computer printer.

The AutoFresh system makes owning a Hot Spring spa **dramatically** easier.

**AutoFresh™**  
EASY, SMART WATER CARE

## Natural... and Sparkling Clean

The EverFresh® system is a pure, natural approach to water care. It reduces the need for chlorine and bromine. You can leave your spa unattended for longer periods of time, change the water less often, and save time and money. Enjoy sparkling, clean water from the very first time you fill your spa, naturally.

### FreshWater® III High Output Ozone System

**A.** Your Hot Spring® spa comes standard with the FreshWater® III high output ozone system\*, an essential part of the EverFresh water care system. It uses Corona Discharge cell technology to continuously generate extremely high levels of ozone. Unlike UV bulb or CD chip systems, it functions efficiently for years with virtually no maintenance required and is far more powerful. The FreshWater III ozone system is available as an option for all Tiger River®, Hot Spot®, and Solana® spas.

### FreshWater<sub>Ag+</sub>® Continuous Silver Ion Purifier

**B.** The FreshWater<sub>Ag+</sub> continuous silver ion purifier further reduces the need for chlorine by introducing silver ions into the spa water that inhibit bacterial growth. Insert the cartridge into the filter of your Hot Spring spa, and the silver ions are released automatically – there's no chance of under- or overdosing. It's virtually maintenance-free – simply replace the cartridge every 3 months.

### MPS Chlorine-Free Oxidizer

**C.** This fast-acting formula attacks cell walls to refresh and brighten spa water. When used with the FreshWater<sub>Ag+</sub> purifier, the MPS chlorine-free oxidizer helps activate the silver ions so they can do their job more quickly. Plus it's pH neutral, so it won't alter water chemistry.

### MPS Test Strips

**D.** Use these test strips to monitor your spa's MPS, pH and alkalinity levels when using the MPS chlorine-free oxidizer as a part of the EverFresh® water care system.

### FreshStart®<sub>10,000</sub> Pre-Filter

**E.** The FreshStart<sub>10,000</sub> pre-filter ensures the water is as clean as possible every time you fill your spa. Attach it to a garden hose to filter out debris and chemicals.

\*except Classic® Series models

## FreshWater® Water Care

Designed for compatibility and ease of use, FreshWater® water care products offered by Hot Spring® are the perfect complement to our spas. With the FreshWater® line of high-quality water care products, you can be sure your spa water is clean, clear, and ready to enjoy.

### Spa Care Starter Kit

**F.** A complete FreshWater spa care kit in one convenient box! The kit includes Concentrated Chlorinating Granules, MPS Oxidizer, pH Up, pH Down, Defoamer, Stain & Scale, 5-Way Test Strips, and a Spa Water Maintenance & Troubleshooting Guide – everything you need to start enjoying your Hot Spring spa!

### Concentrated Chlorinating Granules

**G.** This efficient sanitizing chemical is popular because it is completely soluble and nearly pH neutral. The Concentrated Chlorinating Granules are available in a 1 lb or 2 lb bottle, as well as a 4 lb bottle with a convenient handle for pouring.

### 5-Way Test Strips

**H.** Conveniently monitor the chlorine, bromine, pH, alkalinity and total hardness levels of your spa water with these easy to use test strips.

### Calcium Hardness Increaser

**I.** Raises calcium levels in spa water to protect against “soft” water corrosion and staining.

### Defoamer

**J.** Quickly eliminates foaming from soap, shampoo, cleaners, and other residues.

### pH/Alkalinity Up, pH/Alkalinity Down

**K.** Up prevents pH bounce and deterioration of spa surface and fittings from low total alkalinity, while Down decreases spa water pH.

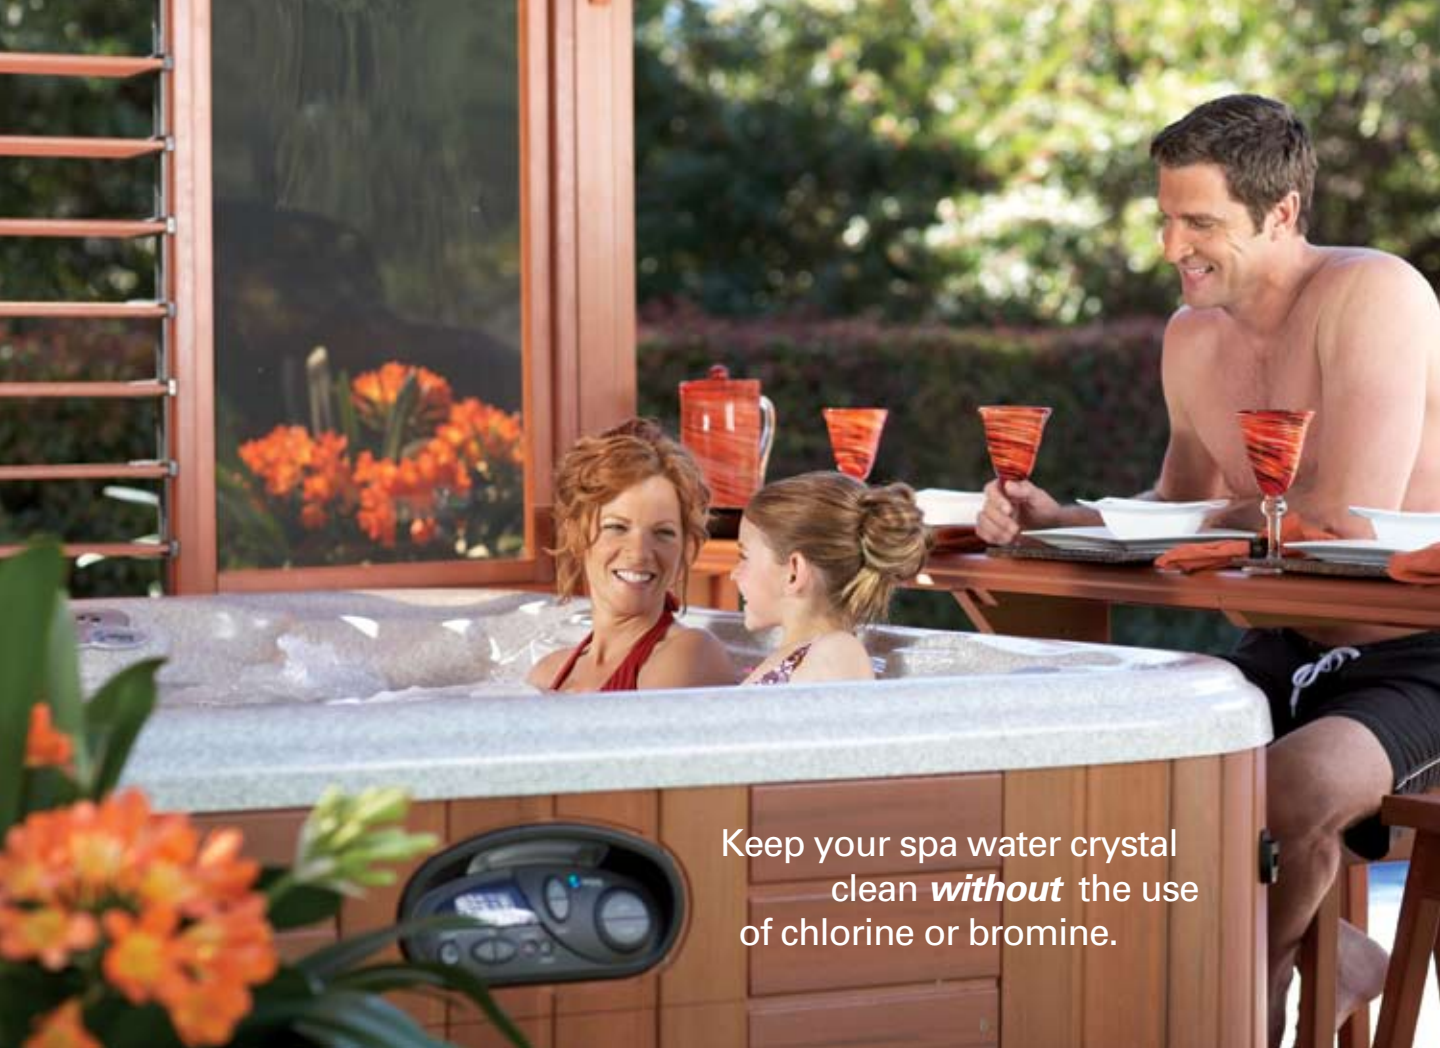

### Stain & Scale Defense

**L.** Prevents calcium build-up on spa surfaces and controls stain and scale formation.

### Spa Shine

**M.** Reactive silicone protects, waterproofs and seals spa shell to prevent fading and oxidation.

Keep your spa water crystal clean *without* the use of chlorine or bromine.

## Advanced Technology For Cleaner Water

To keep your spa water at its cleanest, and your spa's performance at its best, be sure to regularly clean your filters and replace them as necessary. These products have been designed specifically for use with the Hot Spring® family of spas.

### Tri-X® Filter

**G.** The unique Tri-X filter is 3-dimensional to filtrate by depth *and* surface, to deliver more effective filtration area and longer time between cleaning cycles. Plus they're dishwasher-safe for easy maintenance. You can enjoy the benefits of Tri-X filters on any Hot Spring or Tiger River® spa. Check with your dealer to find out which models include these filters as a standard feature.

### Hot Spring Filters

**H.** A Hot Spring spa provides completely balanced filtration, which means the square footage of your filters has been carefully matched to the gallons per minute flow rate of your spa. So when it comes time to replace your filters, remember only Hot Spring filters have been specifically designed to ensure your Hot Spring spa has clean, sparkling water day after day.

## A Chlorine-Free Alternative

This three-step system incorporates the Reduce™, Refresh™, and Revitalize™ water care products to keep your spa water crystal clean without the use of chlorine or bromine. This system uses biguanide, which is gentle on eyes, hair, and sensitive skin, with no harsh odor. The products in this line complement the AutoFresh™ water care system.

### Reduce™

**A.** Specifically designed to prevent waterline film, as well as stain and scale from forming around the perimeter of the spa.

### Refresh™

**B.** A non-chlorine liquid oxidizer formulated to break down oils, lotions and other organic materials while used in conjunction with Revitalize.

### Revitalize™

**C.** This chlorine- and bromine-free sanitizer is virtually odor-free, and controls bacteria longer than chlorine or bromine.

### Cleanser

**D.** Works in conjunction with the three-part biguanide system to remove build-up above the waterline.

### Biguanide Test Strips

**E.** A one dip, easy-to-use test strip that accurately tests biguanide sanitizer, calcium hardness, alkalinity and pH levels in spa water.

### Multi-Purpose Filter Cleaner

**F.** Specially formulated for use with biguanide, the Multi-Purpose filter cleaner is compatible with all types of sanitizers.

[ A,B,C,D,E,F ]

### Filter Cleaner

**I.** Keep your standard or Tri-X filters in their best operating condition with the FreshWater filter cleaner, formulated for use with chlorine-or bromine-based water care, or with the EverFresh® water care system.

### Instant Filter Cleaner

**J.** Extend the life of your filters with this instant, spray on, "no-soak" formula.

### Hot Spring Spa Vac

**K.** Lightweight and portable, the Spa Vac needs no pumping, batteries or water hookups.

### Hot Spring Water Vac™

**L.** Our patented design works with the power of a garden hose to easily remove leaves and small debris.

Quality design and performance  
only a Hot Spring cover can deliver.

## Hot Spring® Spas Have You Covered

**A.** Only a Hot Spring spa cover is designed specifically for your Hot Spring spa. When it comes time for a replacement, never settle for an imitation. What makes a Hot Spring cover special?

### Energy Efficiency

Hot Spring Spas pioneered the first rigid, vinyl cover, creating a higher standard for energy efficiency. The exclusive “shoe” in the cover hinge creates a tight seal that locks in heat. The standard 1.5 lb. and 2.0 lb. foam cores increase the R-factor of the cover, adding to their ability to retain heat.

### Superior Construction

Only the finest materials are used. The custom-fit foam core is tapered to allow water runoff, and covered in superior marine grade vinyl. Polyester thread is treated to withstand years of harsh weather, chemicals and intense sunlight. A poly-ply laminate within the vinyl protects the cover's core from exposure to chemicals and cold. And vinyl flaps shield the nylon zipper and zipper pull for long-lasting use.

### Durable Design

Twenty four internal stress points are reinforced within each Hot Spring cover. Aluminum reinforcement provides maximum strength with minimum weight to support the center of the cover. Four layers of double-stitched vinyl add strength and durability to the hinge. And extra strong padded

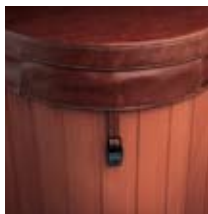

handles have five layers of reinforcement to help ensure long-lasting performance. Every Hot Spring cover is outfitted with exclusive, sturdy brackets to assure strong support and easy installation of Hot Spring approved retractable cover systems.

### Attractive Appearance

Only the beauty of a Hot Spring cover can justly complement your Hot Spring spa cabinet. Each cover's 3.5” skirt provides an elegant, superior fit, and the marine grade vinyl exceeds industry standards for UV and chlorine resistance.

### Safety Certified

Reinforced, adjustable straps help to safely secure the cover to the spa, and include child resistant safety locks that can be locked with a key. Every Hot Spring cover is UL Classified in accordance with ASTM safety standards.

### Cover Shield

**B.** Cleans, shines and protects the vinyl to keep it looking beautiful for the life of the spa cover.

## Uncover Ultimate Relaxation

Our exclusive retractable cover systems simplify your spa experience. With the added convenience of a cover lifter, you'll find you use your spa more often and enjoy it even more. Attaching directly to the spa cover, a cover lifter increases the cover's life and helps maintain its good looks.

### CoverCradle® Retractable Cover System

**C.** This sophisticated design features dual pneumatic gas springs that gently and effortlessly glide the cover off and back onto the spa. Requires 24” clearance.

### CoverCradle II Retractable Cover System

A streamlined design that uses only one gas spring and allows for a smooth glide operation. Requires 24” clearance.

### GlideRite® Retractable Cover System

**D.** This simple and efficient design requires 14” clearance.

### Lift 'n Glide® Retractable Cover System

**E.** This economical system helps avoid cover wear and tear in daily use. Requires 14” clearance.

### UpRite® Retractable Cover System

**F.** Designed specifically for low-clearance areas such as decks and gazebos, this system lifts the cover up over the spa bar top. Requires only 7” clearance.

Create a place where you can get away, without ever leaving your backyard.

## Spa Side Complements

### Spa Side Umbrella

**A.** Constructed from powder coated aluminum and zinc-plated steel, this umbrella resists rusting and rotates 360° for use over your spa or patio furniture. A base plate slips under the spa cabinet for stability and the 9'9" diameter canopy is available in either Hunter Green or Beige.

### Spa Side Towel Tree

**B.** Easy to assemble, this powder coated aluminum tree has a bronze finish.

### Spa Side Handrail

**C.** This handrail swings inward or outward for both in- and out-of-spa use. A base plate slips securely under spa cabinet.

### Spa Cover Stand

**D.** This sturdy stand, made of rust resistant zinc-plated and powder coated steel, is a great storage option for Solana® spa covers. And there's no hardware or assembly required.

Add **ambiance** to your spa experience.

## Match color to your mood

**E.** Enhance your evening spa setting with beautiful outdoor lighting. The Clarion® external light bars can be positioned on your Hot Spring® or Tiger River® spa cabinet and/or step to add to your backyard ambiance. The external lighting can also offer additional safety by illuminating the entrance into your spa.

Match color to your mood with multi-color choices for your spa's interior. The Luminescence® system is included on Hot Spring spas and optional on Tiger River models, while the Splendors® light kit adds color to the interior of your Hot Spot® or Solana® spa.

### Spa Pillow

**F.** Lean back, relax and fully experience your spa's soothing sensory performance with this convenient, comfortable and portable Spa Pillow.
